Collage Map of My Community Project Directions
Created by artist: Shannah Warwick

Materials in kit: cardstock, construction paper, felt, jewels, pipe cleaners, a variety of collage materials, glue stick and markers
Materials needed: scissors

1. Start with a piece of paper

2. Think about where you live, go to school, shop, play and do things around town.

3. Use a pencil to draw a map of your community including the places you thought of from number 2.

4. Take out the collage materials from the kit. Look around your home for additional materials you may want to use.

5. Begin making the places or buildings where you live out of collage materials.

6. Lay the pieces out on your map as you make them. Don’t glue them onto your map yet.

7. When finished with all of your pieces, lay them onto your map. Use markers to add signs.

8. Take all the places or buildings off your map and begin gluing them one by one to create your community!
Collage Map of My Community Project Inspiration
Created by artist: Shannah Warwick

Create your own collage map inspired by a contemporary work of art in The Rockwell Museum Collection created by a female artist, *Under the Elevated* by DeAnn Prosia. DeAnn’s work celebrates the way buildings and structures fit together in a setting. Using felt, fabric, and mixed media materials, design a textile map of your community. What places and building will you include in your map?
